DELIVERY

The delivery takes place within the 14 days following the invoice settlement (prepayment) via mail or small package services.

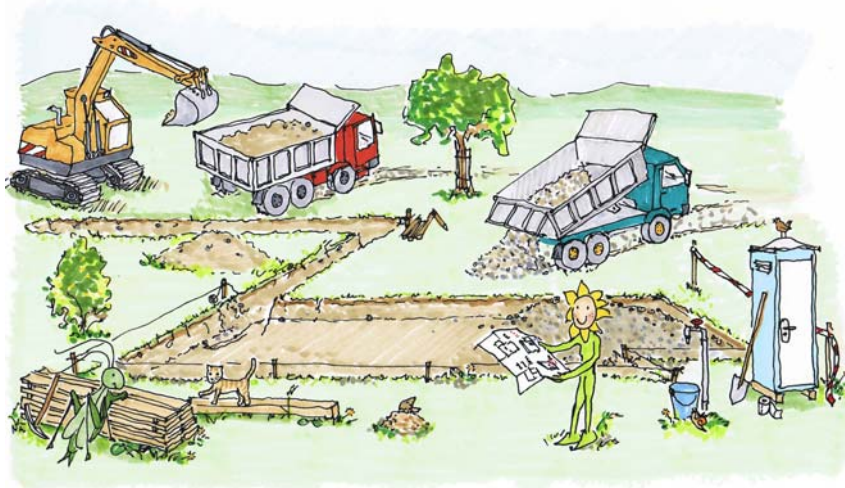

A PASSIVE HOUSE IS WRAPPED UP VERY WARM
SO THAT ONLY LITTLE HEAT GETS LOST
DURING THE COLD SEASON OF THE YEAR.
THE SUN SHINING THROUGH THE WINDOWS
WORKS LIKE A HEATER.

HOW AND WHY IT WORKS WILL BE
EXPLAINED TO YOU BY
LOTTIE AND FRICK
IN THIS BOOK.

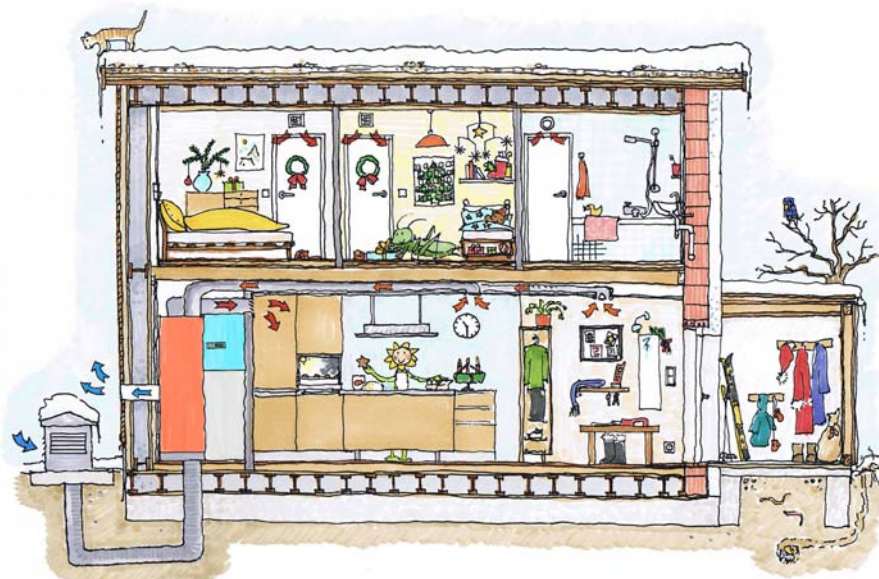

In our “We are building a solar house“ book, readers can search, flip, turn and pull. In a way suitable for children, the young readers obtain...

...basic information about the construction process...

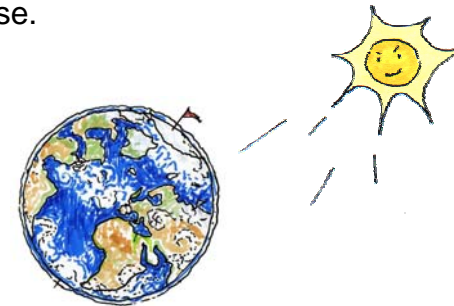

..... and information about the passive house technology.

For those in favour of experiments, there are instructions for experiments concerning heat...

...and of course the book explains why building “solar houses” makes sense.

This book is for children aged between 5 to and 10 and explains in an easy way how a passive house works and why green and energy-aware building makes sense. Ideal for the use in schools, kindergardens and for kids projects and projects of environmental protection.

20 pages / some pages with flip images and moving parts

“This book is great. Something like this is exactly what I wished for...”

Dr Wolfgang Feist / Passivhausinstitut Darmstadt

You can order this book as of March 2008 at www.aap.or.at or send the overleaf order form via mail or fax to: DI Alexandra Frankel - aap.architekten, Albertplatz 1/6 1080 Vienna, fax.: +43/1-4022026-19
